

<PYTHON> WORKSHOP 1.0

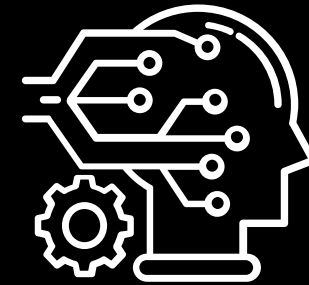

A multi-purpose language
with a simple and beginner-
friendly syntax

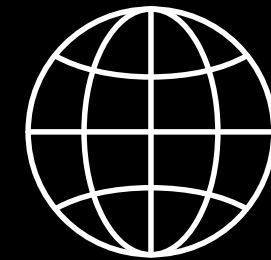

WHAT IS PYTHON?

Automation

**Machine
Learning**

**Web
development**

Data Science

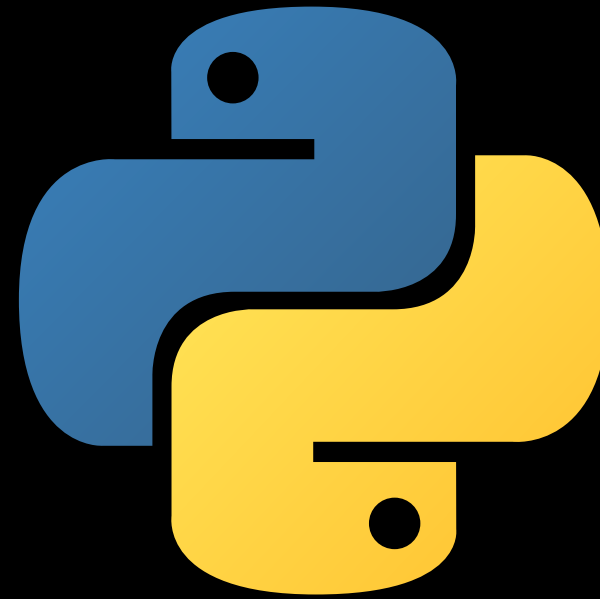

WHAT CAN BE DONE?

High Level

**Cross-
platform**

**Huge
Community**

**Huge
Ecosystem**

WHY PYTHON?

```
using System;
```

```
class Program
```

```
{
```

```
    static void Main()
```

```
    {
```

```
        Console.WriteLine("Hello, World!");
```

```
    }
```

```
}
```

```
print("Hello, World!")
```

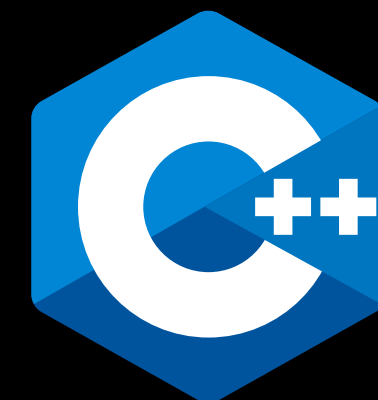

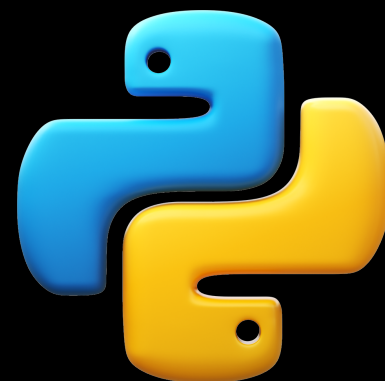

```
#include <iostream>
```

```
int main() {
```

```
    std::cout << "Hello,  
World!" << std::endl;
```

```
    return 0;
```

```
}
```

LET'S BEGIN
